EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claim 3 since it is a repeat limitation of claim 1 line 7.

Claim 4, line 1, change "3" to ---1---.

The following is an examiner's statement of reasons for allowance:

Gaston teaches all the essential elements of the claimed invention however fails to teach a rigid and non-pivoting descending member. Even if the support leg (24) were considered a rigid non-pivoting descending member, the height of the support leg is not equal to the height of the notched plate.

Holliday et al. teaches all the essential elements of the claimed invention however fails to teach that the width of the descending member is less than about one-half inch nor is the height of the descending member equal to the length of the notched plate.

Giustino teaches all the essential elements of the claimed invention however fail to teach a descending member that contacts the substrate while maintaining an angle of the notched edge at 45 to 90 degrees.

Sourek fails to teach rigid descending members that have a width of less than one-half inch.

Art Unit: 1744

None of the references teach all the essential element of the claimed invention nor would it have been obvious to modify the references since there is no motivation or teaching to do so. Therefore, the present invention is free from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
